## USG ABDOMEN

### Liver:

Is normal in size and shows **diffusely increased** echotexture. Intrahepatic biliary radicles and CBD appear normal.

Gall Bladder: Normal.

### Pancreas:

Appears normal in size and shows uniform echotexture to the extent seen. The pancreatic duct is normal. No calcifications are seen.

### Spleen:

Appears normal in size and shows uniform echotexture.

### Kidneys:

The kidneys are normal in size and position.

Renal cortical echoes and cortico medullary differentiation are normal on both sides.

RT.Kidney measures 10.2 cm. A calculus measuring 4 mm noted in the lower pole.

A calculus measuring 8.7 mm is noted in the distal ureter causing mild hydroureteronephrosis.

LT.Kidney measures 9.9 cm.

Pelvicalyceal system is not dilated. No calculus seen.

### Bladder:

Shows normal contour. No intraluminal echoes are seen. No calculus or diverticulum is seen.

**Prostate:**

Measures 4.1 x 3.4 x 3.1 cm. Vol: 23.6 cc. Normal in size and echotexture.

**Retroperitoneum:**

Appears normal. No retroperitoneal lymphadenopathy. No free fluid in peritoneal cavity.

**Impression:**

- Grade I fatty liver.
- Right renal calculus.
- Right distal ureter calculus causing mild hydroureteronephrosis.
